

## **Important Installation Note** [↑ Back to Top](#)

After installing and activating the theme, you need to navigate to **Settings > Permalinks** and click on the “**Save Changes**” button, even if you haven’t made any changes. This is to register the custom post types used in the theme.

You also need to navigate to **Settings > Reading** and set front page to display “**Your latest posts**” if you have previously had a static page as your front page.

## **Homepage Overview** [↑ Back to Top](#)

The homepage consists of a homepage slider, mini-features area, widgetized sidebar and footer regions.

## Homepage Slider

Just another slide

Add the slides you want to appear here by creating them under Slides > Add New

You can add images or video content to display along with the text.

Enable and set up this slider under the theme options for "Homepage Slider".

## Mini Features

Add the mini features you want to appear here by creating them under Mini Features > Add New

Enable this section and the "Homepage Layout" theme option's panel.

## Sidebar

Add your sidebar widgets under the Appearance > Widgets page.

## Blog

Latest from our blog

This section pulls in your latest blog posts. Set the number of blog posts that must display here under the "Homepage Layout" theme option's panel.

Set the thumbnail alignment under the "Dynamic Images" theme options panel.

The home page modules of Biznizz explained.

## Featured Slider [↑ Back to Top](#)

The Biznizz home page featured area pulls the custom **Slides** post type. The number of slides is set under the “Homepage Slider” theme option’s panel. You can also set the animation speed, auto start and slide interval under the theme options.

### Adding a slide

To add a slide simply follow these steps:

1. Go to **Slides > Add New**.
2. Type a title for the slide and complete all of the post’s body content.
3. Add a “Slider Image” in the Custom Settings panel if you want to display an image in the slide.
4. **Publish** the slide.

Edit a Slide in Biznizz

### Add buttons to Featured Slider

To add a button to a page in the featured area, you need to add some html code by using the HTML tab. Simply add a link, surrounding it with the short code you can see in the example above.

### Add video to Featured Slider

Adding video is just as simple as adding an image to the page. Simply use the **Video Embed Code** field in the Custom Settings panel, and add your embed code.

**Mini-Features** [↑ Back to Top](#)

The main area consists of a left column that can hold mini-features, and a right column that holds the home widgetized sidebar. The left main column can also hold page content above or below the mini-features area.

### **Add Mini-features Block**

The Biznizz home page mini features area also uses custom post types and pulls in the the custom “Mini Features”. The number of mini features depends on how many “Mini Features” you have published. You can enable the mini features area on the home page under the “Homepage” theme options. You can also add two pieces of content from WordPress pages to the home page if you specify the page IDs of the pages you wish to display.

To add an info box simply follow these steps:

1. Go to Mini Features > Add New.
2. Type a title for the Mini Features and complete all of the post’s body content.
3. Add a “Mini Features Icon” in the Custom Settings panel if you want to display an icon next to the slide.
4. Add an excerpt
5. Publish the mini feature.

**Biznizz Custom Settings**

[General Settings](#)

**Mini-features icon**

[Upload](#)

Upload icon for use with the Mini-Feature on the homepage (optimal size: 32x32px) (optional)

**Mini-features Excerpt**

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vestibulum sed luctus lectus. Sed nec est vitae orci scelerisque scelerisque vitae sed velit.

Enter the text to show in your Mini-Feature.

**Mini-features URL**

Add an URL for your Read More button in your Mini-Feature on homepage (optional)

Edit Mini-Feature in Biznizz

Remember to enable the mini features area in the theme options under **Biznizz > Theme Options > Homepage Layout**

Enable Mini-Features in Biznizz

## Additional Homepage Modules [↑ Back to Top](#)

Biznizz also allows you to place particular WordPress page content on your home page. Simply specify the page in the theme option's under "Homepage Layout". There are two allocated spaces available to place two particular pages of content.

## Blog Page Template [↑ Back to Top](#)

To add a **Blog** to the main navigation, simply follow these steps:

1. Add a new Page in WordPress **Page > Add New**.
2. Add a title to the page e.g. "Blog".
3. Select the **Blog** page template in the Attributes panel on the right (below Publish).
4. **Publish** your new page!

If you are unsure on how to setup a page template, have a look at our instructional video in our [Page Template section](#).

## Portfolio Page Template [↑ Back to Top](#)

This theme includes a portfolio template which can showcase your work or products. To add the portfolio you need to follow these steps:

### Add the Portfolio link to navigation

1. Add a new Page in WordPress **Page -> Add New**.
2. Add a title to the page e.g. "Portfolio".

3. Select the **Portfolio** page template in the Attributes panel on the right (below Publish).
4. **Publish** your page!

## Adding portfolio items

The portfolio section also uses a custom post type called “Portfolio”.

1. Add a new portfolio item in WordPress (Portfolio -> Add New)
2. Add a title to the portfolio item
3. Add a tag to the post if you wish to categorize your portfolio (e.g. “Web” or “Print”)
4. Add some text in the content to describe the portfolio item
5. Upload the Portfolio Thumbnail (450x210px) image in the Custom Settings area
6. Add an URL to an external image or upload a large image which your thumbnail will link to
7. Publish the portfolio item and repeat for next portfolio item

Remember you must have uploaded a “Portfolio Large” image for image attachments to work.

The screenshot shows the WordPress 'Edit Portfolio Item' interface. The main content area has a title 'Shirt' and a rich text editor with the text 'This is a nice t-shirt design. Click on it to view the full size image in a lightbox.' Below the editor is the 'Biznizz Custom Settings' section, which includes a 'Portfolio Thumbnail' field and a 'Portfolio Large' field with the URL 'http://demo.woothemes.com/biznizz/files/2011/01/shirt-650.jpg'. On the right side, the 'Publish' panel shows the status as 'Published' and the visibility as 'Public'. Below the publish panel is the 'Tags' section and a 'Featured Image' section showing a white t-shirt with a circular logo.

Edit a Portfolio Item in Biznizz

**Upload multiple images per portfolio item**

To have multiple images under the portfolio item, enter the rest of the images by uploading image attachments to the Portfolio Item and click Save Changes. **You must leave the “Portfolio Large” field empty if you wish to show multiple images in the lightbox.**

Upload Multiple Images to a Portfolio Post

## Setup options

1. Go to the theme Options Panel
2. Tick “use lightbox” if you wish the large images to display as an overlay when clicked on, not a link that takes you to a new window.
3. Tick “Use dynamic image resizer” so that the portfolio images are resized correctly on the portfolio page.
4. If you added any tags to your posts, then add these tags to “Portfolio Tags” field (e.g. “web, print”)
5. Save settings and you’re done!

Portfolio Settings in Biznizz

## **Add a pricing table** [↑ Back to Top](#)

To add a simple pricing table to any page or post, simply drop [this HTML code](#) into your post or page using the HTML tab in your post editor.

## **Custom Biznizz widgets** [↑ Back to Top](#)

The theme includes 8 custom widgets that you can add to any one of your 5 widgetized areas (1 Primary sidebar & 4 footer widgetized areas).

- Woo – Flickr
- Woo – Twitter Stream
- Woo – Adspace Widget
- Woo – Search
- Woo – Embed/Video
- Woo – RSS
- Woo – Tabs
- Woo – Blog Author Info
