

Inspire:

Important installation note [↑ Back to Top](#)

After installing and activating the theme, you need to navigate to **Settings > Permalinks** and click on the “**Save Changes**” button, even if you haven’t made any changes. This is to register the custom post types used in the theme.

You also need to navigate to **Settings > Reading** and set front page to display “**Your latest posts**” if you have previously had a static page as your front page.

Homepage Overview [↑ Back to Top](#)

The homepage consists of a featured area, mini-features area, home sidebar and a widgetized footer.

You won't find a better product than this!

Inspire is a business theme with a custom homepage that includes a featured area, mini widgets and expanded footer. You can showcase your product or service and be easily navigated with the buttons below.

WIDGETIZED FOOTER AREA

WIDGETIZED FOOTER

This is an optional widgetized footer which has one wide and one narrow column. The Woo News widget fits best on the left side but you can swap it for anything you like.

Setup Featured Area [↑ Back to Top](#)

The Inspire home page featured area pulls the custom “slides” post type. The number of slides depends on how many slides you have published. You can set the animation speed, auto start and slide interval under the theme options, the rest of the slide functionality is added via the slides panel documented below.

Adding a slide

To add a slide simply follow these steps:

1. Go to **Slides > Add New**.
2. Type a title for the slide and complete all of the post’s body content.
3. **Add a “Slider Image”** in the **Inspire Custom Settings** panel if you want to display an image in the slide.
4. Publish the slide.

Adding a slide to the Inspire featured area

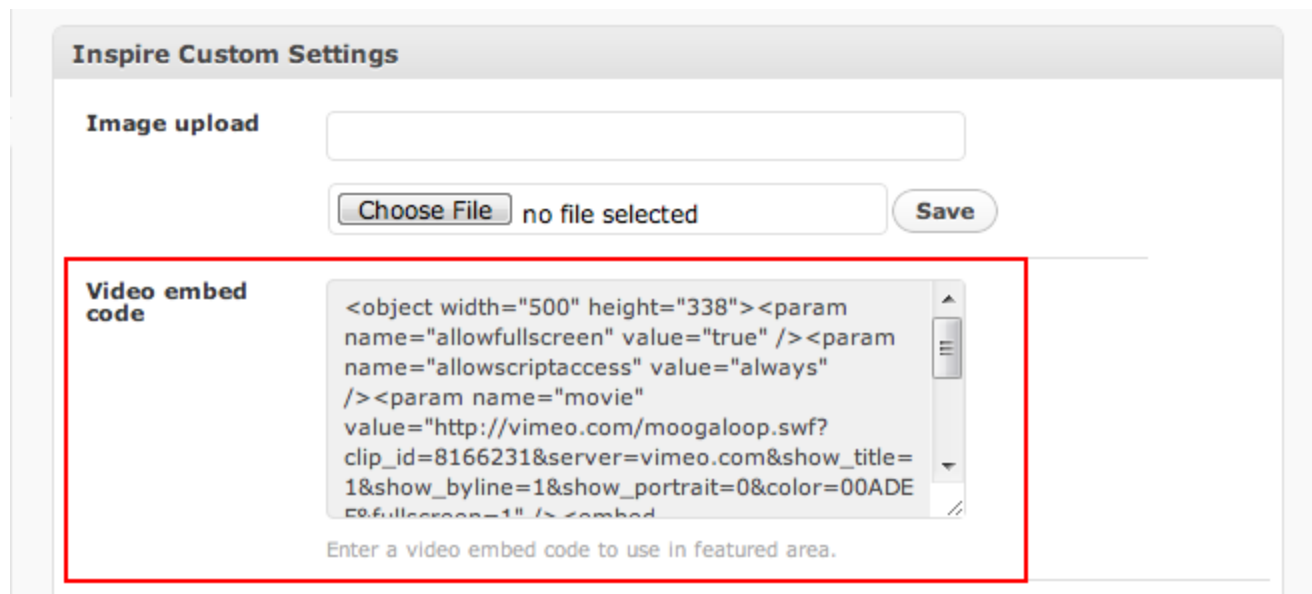

Add buttons to featured page

To add a button to a page in the featured area, you need to add some html code by using the HTML tab. Simply add a link with the class `btn` and wrap the text in a `span`:

```
<a class="btn" href="https://www.woothemes.com/2010/05/inspire/"><span>Take a
tour</span></a>
<a class="btn"
href="https://www.woothemes.com/2010/05/inspire/"><span>Pricing and
signup</span></a>
```

Add video to featured page

Adding video is just as simple as adding an image to the page. Simply use the **Embed** field in the Custom Settings panel, and add your embed code.

Adding video embed code

Setup Mini-Features Area [↑ Back to Top](#)

The main area consists of a left column that can hold mini-features, and a right column that holds the home widgetized sidebar. The left main column can also hold page content above or below the mini-features area.

Add Mini-features Block

The Inspire home page mini features area also uses custom post types and pulls in the the custom “Mini Features”. The number of mini features depends on how many “Mini Features” you have published. You can enable the mini features area on the home page under the “Homepage” theme options. You can also add two pieces of content from WordPress pages to the home page if you specify the page IDs of the pages you wish to display.

To add an info box simply follow these steps:

1. Go to **Mini Features > Add New**.
2. Type a title for the Mini Features and complete all of the post’s body content.
3. **Add a “Mini Features Icon”** in the **Inspire Custom Settings** panel if you want to display an icon next to the slide.
4. Add an excerpt
5. Publish the mini feature.

Inspire Custom Settings

Mini-features Icon

Upload icon for use with the Mini-Feature on the homepage (optimal size: 32x32px) (optional)

Mini-features Excerpt

This is a little mini-feature text which can be linked to the full page. Add the text in the Custom Settings field.

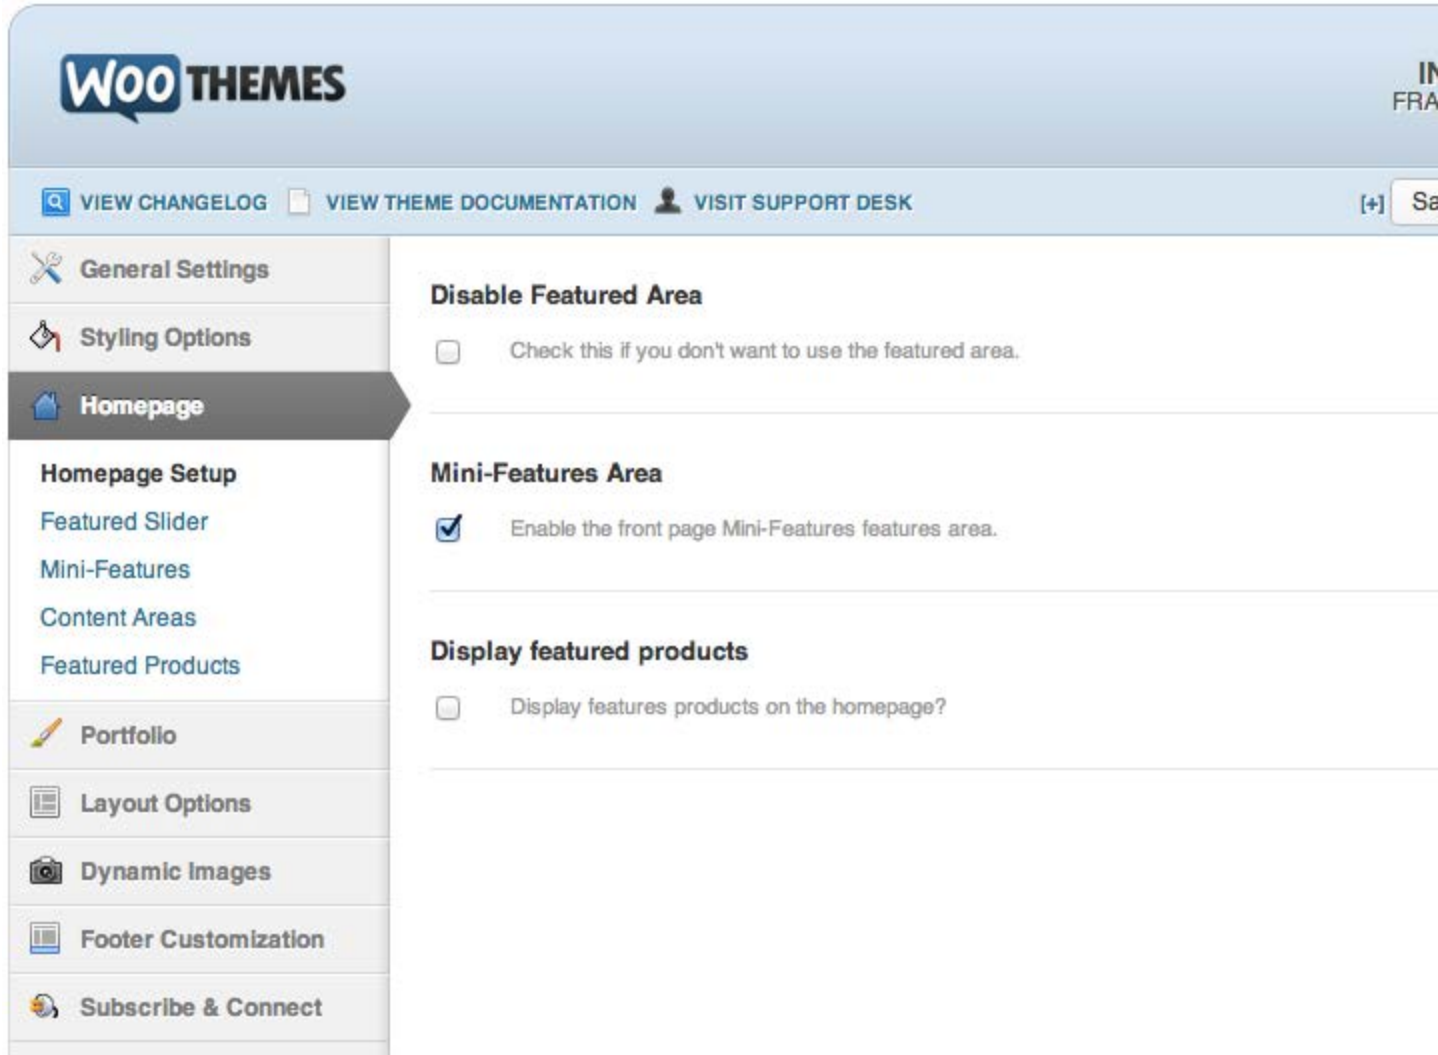

Enter the text to show in your Mini-Feature.

Mini-features URL

Add an URL for your Read More button in your Mini-Feature on homepage (optional)

Adding a mini feature

To enable the mini features area go to **Inspire > Theme Options > Homepage > Homepage Setup**.

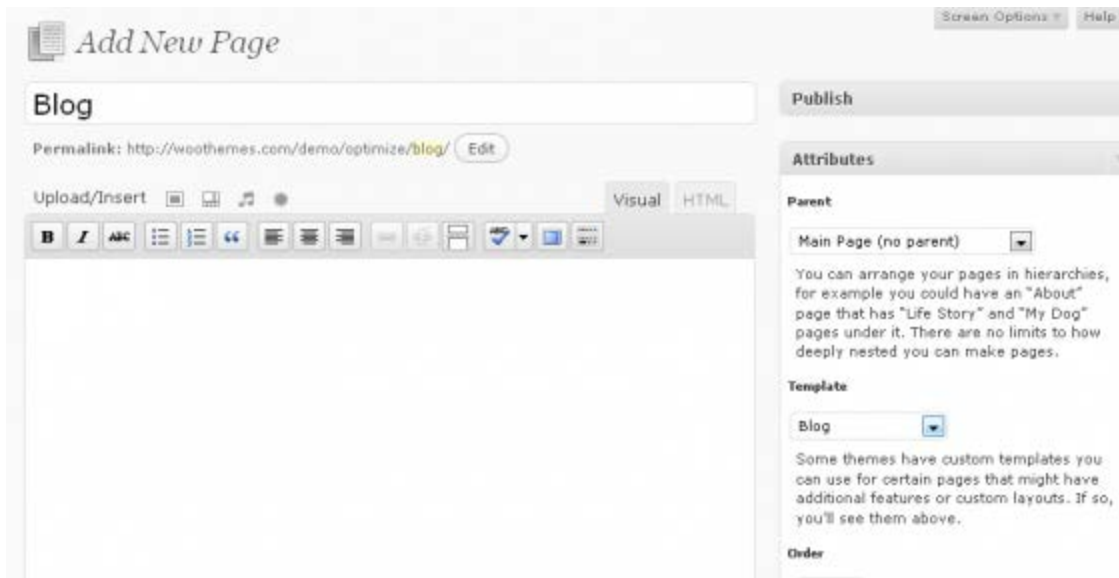

Enabling the mini features area

Setup Blog [↑ Back to Top](#)

To add a **Blog** to the main navigation, simply follow these steps:

1. To add a new Page in WordPress go to: **Page -> Add New**
2. Add a title to the page e.g. “Blog”
3. Select the **Blog** page template in the Attributes panel on the right
4. Publish your page!

Add blog page template

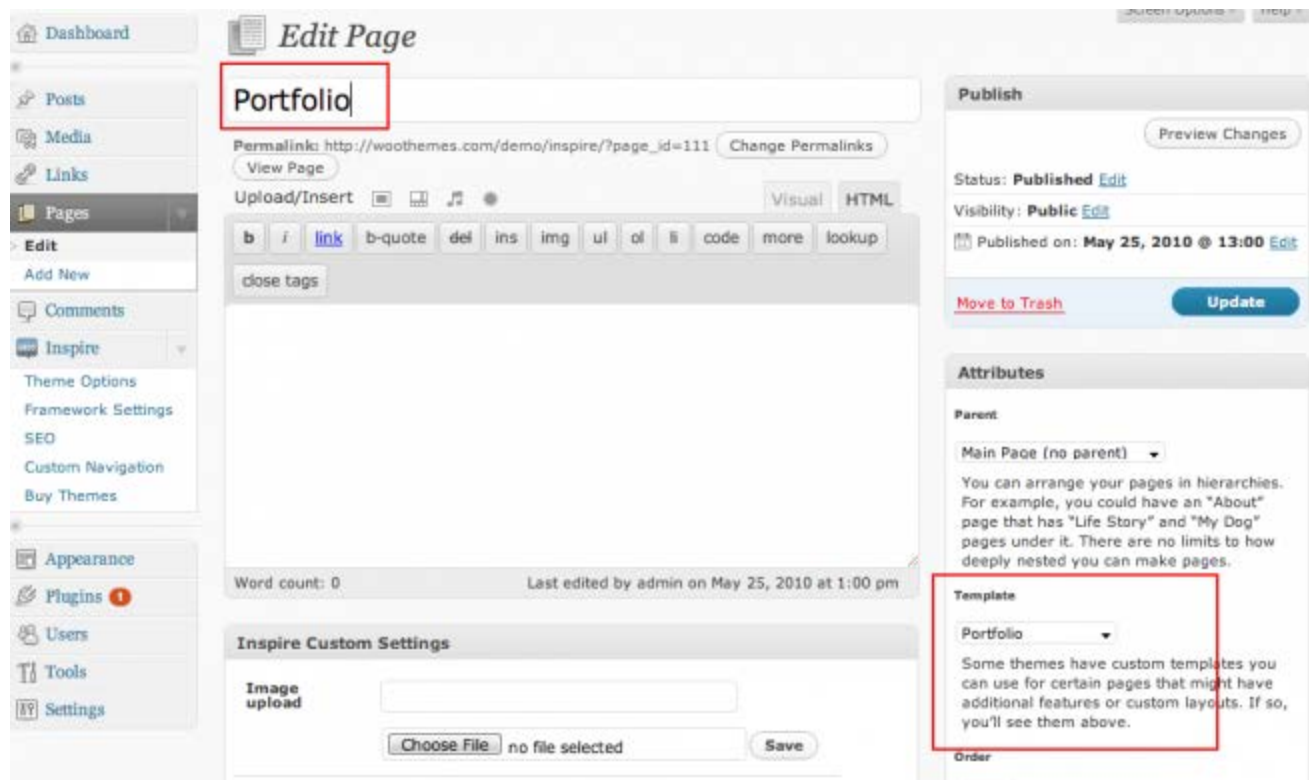

If you are unsure on how to setup a page template, have a look at our instructional video in our [Page Template section](#).

Setup the Portfolio [↑ Back to Top](#)

This theme includes a portfolio template which can showcase your work or products. To add the portfolio you need to follow these steps:

Add a Portfolio Page

1. To add a new Page in WordPress go to: **Page -> Add New**
2. Add a title to the page e.g. "Portfolio"
3. Select the **Portfolio** page template in the Attributes panel on the right
4. Publish your page!

Setup a portfolio page template

Adding portfolio items

The portfolio section also uses a custom post type called “Portfolio”.

1. To add a new portfolio item in WordPress go to: **Portfolio -> Add New**
2. Add a title to the portfolio item
3. Add a tag to the post if you wish to categorize your portfolio (e.g. “Web” or “Print”)
4. Add some text in the content to describe the portfolio item
5. Upload the **Portfolio Thumbnail** (450x210px) image in the **Inspire Custom Settings** panel
6. Publish the portfolio item and repeat for next portfolio item

Inspire Custom Settings

Portfolio Thumbnail

Upload an image for use in the portfolio (optimal size: 450x210)

Portfolio Large

Add an URL OR upload an image for use as the large portfolio image

Adding a portfolio item

URL

Add an URL for your Read More button in your Mini-Feature on homepage (optional)

Portfolio Thumbnail

no file selected

Upload an image for use in the portfolio (optimal size: 450x210)

Portfolio Large

no file selected

Add an URL OR upload an image for use as the large portfolio image

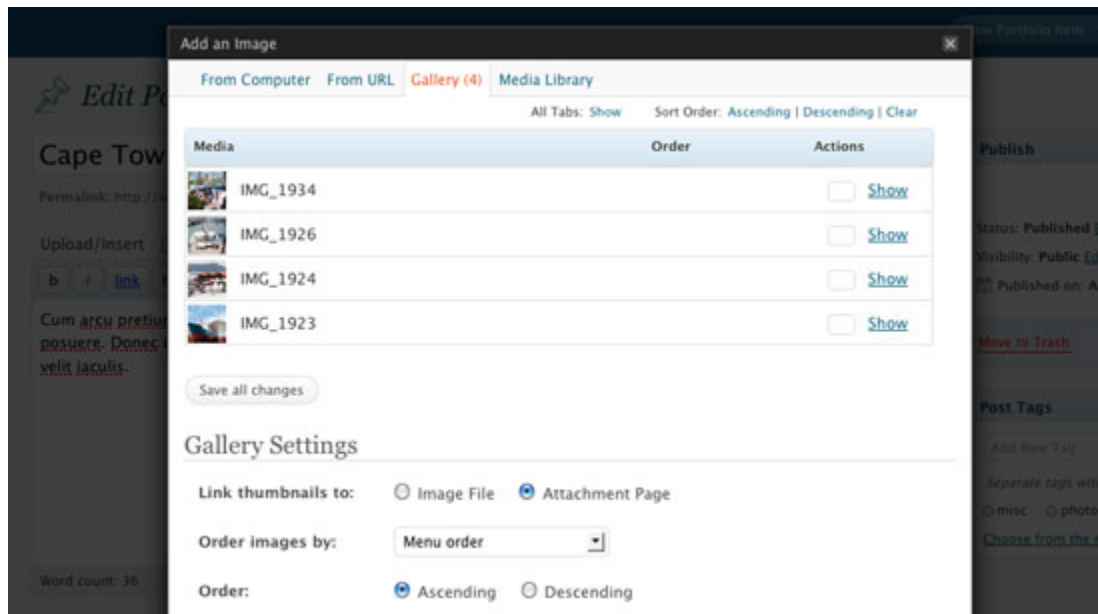

SEO - Remove Nofollow Make link from this post/page followable by search engines.

Add portfolio thumbnail and large image to post.

Remember you must have uploaded a “Portfolio Large” image for image attachments to work.

Upload multiple images per portfolio item

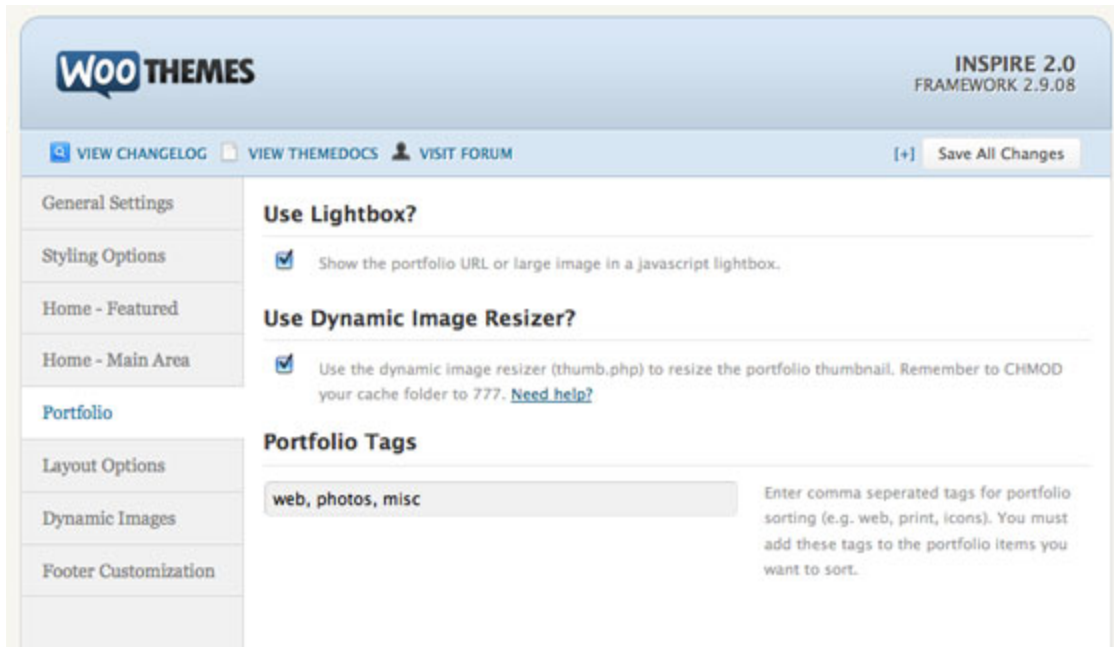

To have multiple images under the portfolio item, enter the rest of the images by uploading image attachments to the Portfolio Item and click Save Changes.

Uploading multiple images to a portfolio item

Portfolio Setup Options

1. Go to the **Inspire > Theme Options** panel
2. Select “**Use Lightbox**” if you wish the large images to open as a pop-up when clicked on, not a link that takes you to a new window.
3. Select “**Use Dynamic Image Resizer**” so that the portfolio images are resized correctly on the portfolio page.
4. If you added any tags to your posts, then add these tags to “**Portfolio Tags**” field (e.g. “web, print”)
5. Save settings and you’re done!

Additional portfolio settings in the theme options

Custom Optimize widgets [↑ Back to Top](#)

The theme includes 8 custom widgets that you can add to any one of your widgetized areas:

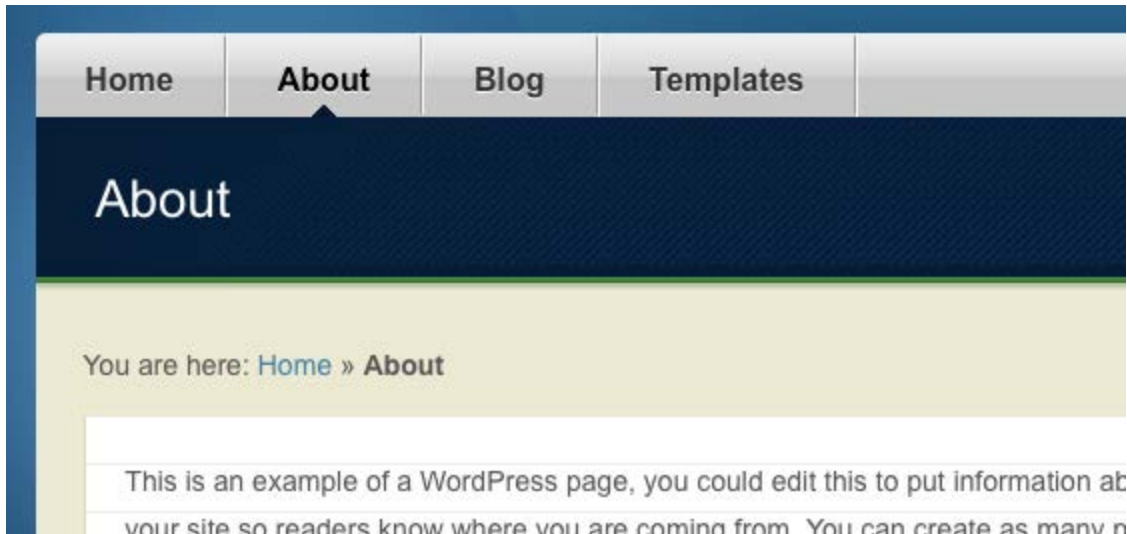

- Woo – Flickr
- Woo – Ads Widget
- Woo – Search
- Woo – News
- Woo – Tabs
- Woo – Feedback
- Woo – Blog Author Info
- Woo – Twitter Stream

To learn more about how to add Widgets please see our tutorial here: [How to Add Widgets](#)

Supported Plugins [↑ Back to Top](#)

Yoast Breadcrumbs

Easily add breadcrumbs to your WooThemes template to show your site visitors exactly where they are on your site. If you're using one of the supported WordPress frameworks, it's as easy as installing and enabling the plugin and checking the "Try to add automatically" box.

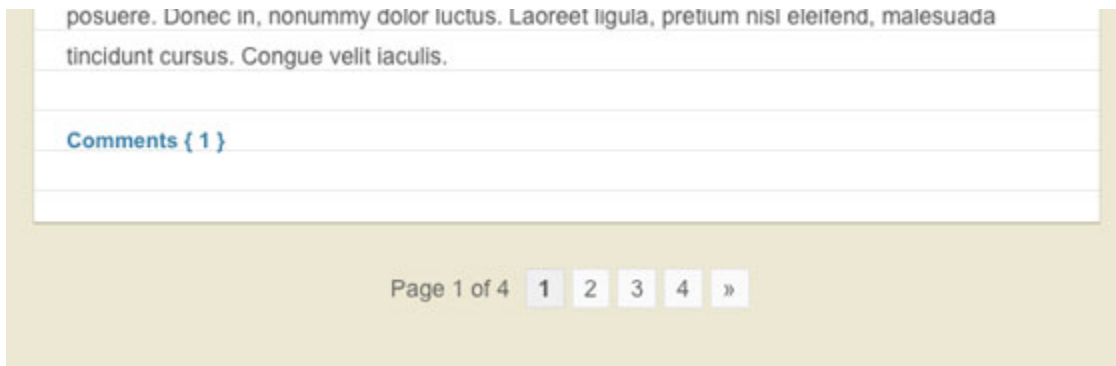

After the Breadcrumbs installation, you'll enable this functionality on all pages

You can download the plugin from the [WordPress plugin directory](#) here.

Page Navi

Page Navi adds a more advanced paging navigation to your WooThemes site. By default you'll see the "Previous" and "Next" buttons to navigate to older/newer blog posts in the archives. With Page Navi you can navigate via the number of archived blog post pages there are.

How the Page Navi pagination results look.

You can download the plugin from the [WordPress plugin directory here](#).
