

Adding Video Posts [↑ Back to Top](#)

Adding a video to your post is very easy. Simply copy the **embed code** from your favorite video site (like YouTube or Vimeo) into the **WooTube Custom Settings** field. It will automatically be resized* to fit in the post, but if you wish to set a manual height (or width, but we recommend using the default), you can use the extra fields under the embed code.

WooTube Custom Settings

Image

Upload file here...

Embed Code

```
<object width="640" height="360"><param name="allowfullscreen" value="true" /><param name="allowscriptaccess" value="always" /><param name="movie" value="http://vimeo.com/moogaloop.swf?clip_id=2165451&server=vimeo.com&show_title=1&show_byline=1&show_portrait=0&color=00ADEF&fullscreen=1" /></embed>
```

Enter the video embed code for your video

Width

Default: 640px. Leave empty or enter another width for your video (e.g. 500)

Height

Default: 360px. Leave empty or enter another width for your video (e.g. 500)

** Note: If for some reason your embed code isn't resizing properly, you should change the values of width and height manually in your embed code.*

Adding images to posts [↑ Back to Top](#)

Background Information

Our themes use a custom image resizing script (thumb.php) which will dynamically resize, crop & create an image in the appropriate size needed for the template. It is optional to use this in WooTube. If you don't elect to use it, you will have to manually resize all your thumbnails to 190x142px before adding them to the Custom Settings.

Instructions:

[View video demonstration.](#) To add images to your posts, please reference the screenshot below and follow the subsequent instructions:

WooTube Custom Settings

Upload file here...

Embed Code

```
<object width="640" height="360"><param
name="allowfullscreen" value="true" /><param
name="allowscriptaccess" value="always" /><param
name="movie" value="http://vimeo.com
/moogaloop.swf?clip_id=2165451&server=vimeo.com&
show_title=1&show_byline=1&show_portrait=0&
color=00ADEF&fullscreen=1" /></embed
```

Enter the video embed code for your video

Width

Default: 640px. Leave empty or enter another width for your video (e.g. 500)

Height

Default: 360px. Leave empty or enter another width for your video (e.g. 500)

1. On your Write > Post tab, complete all of the standard fields when adding a new post.
2. Then, click on the “Add Media” icon and upload an image of your choice.
3. Once uploaded, copy the complete “Link URL” field.
4. Now scroll down to the WooTube Custom Settings panel and paste the “Link URL” into the “Image” field.

Setting up the WP-PostRatings Plugins [↑ Back to Top](#)

This awesome plugins allows you to change the layout of its output considerably. To get the optimal use of the plugin, we would suggest that you emulate our setup, which is present on the [demo of WooTube](#). To do this, simply alter the plugin options like on our screenshots below:

- On Ratings > Ratings Options Tab: [See Screenshot](#)
- On Ratings > Ratings Templates Tab: [See Screenshot](#)

Widgets

Custom Widgets

WooTube includes a few custom, WooTube-specific widgets to allow you more customisation options than ever before. Here’s a brief run-down of the custom widgets:

- Woo – Flickr;
- Woo – Search; and
- Woo – Ads 200×200*;

** denotes that there are options inside the widget that you may need to set for it to operate properly*
